Election/Restrictions

- This application is in condition for allowance except for the presence of claims 6-12 and 14-17 to Group II, being non-elected without traverse. Accordingly, claims 6-12 and 14-17 have been cancelled.

EXAMINER'S AMENDMENT

- An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- The application has been amended as follows: Claims 6-12 and 14-17 are cancelled.

REASONS FOR ALLOWANCE

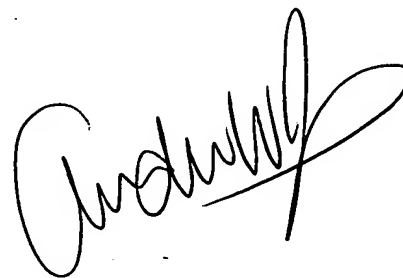

- The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for enhancing color fidelity in multi-reproduction. The sole independent claim identifies the uniquely distinct feature, "for decoding color information contained in a watermark, while comparing the decoded color information with a scanned image and generating a correction table from the differences between the decoded color information and the scanned image and performing color correction on the scanned image using the correction table".
- The closest prior art, Patton et al. (USPN 6,304,345 B1), disclose for digitally scanning an image and informational data provided on a print, the informational data containing a calorimetric value of at least one specific area of the image and information relating to the location of the at least one specific area, the digital scanning operation also obtaining the current calorimetric value of the at least one specified area, while comparing the current colorimetric value of the at least one specified area to the calorimetric value provided in the informational data for the at least one specified area and adjusting the scanned image of the print in accordance with the information obtained with regard to the colorimetric value

obtained for the at least one specified area so as to obtain a modified image; while Shibata (USPN 6,268,866 B1), discloses digital watermarking system for making a digital watermark with few colors of input image, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
